

Rest easy with **Simon**.

Simon is simply better

For years, Simon® has been the first name in affordable security. Now it carries on that legacy with even stronger performance and greater simplicity. Simon is the compact system that is easy to operate and install.

Simon packs a new level of advanced security into a panel design that is smaller and more attractive.

No other system offers such impressive capabilities at such an affordable price.

Simon® The world's most advanced wireless security system

Easy to understand system operation

Simon's built-in voice directs you through every step of the operating system. It is so simple that even a small child can follow the instructions and use the system.

Even more control Only Simon offers an optional talking touchpad to serve a back door or master bedroom. You can enter commands and hear feedback from the wireless touchpad, making it very easy to use.

Communication is easy with two-way voice

In the event of an emergency, two-way voice allows you to talk and listen to your monitoring operator without pressing any buttons. No hassles, no confusion, just effective communication.

Be informed, wherever you go Simon can call any telephone and leave a clear, concise voice message notifying you of system alarms.

Special care for elderly or disabled Simon is designed with special security needs in mind. In addition to a full range of personal emergency pendants, Simon can call for help should it detect a lack of activity within your home or business.

Less worry for working parents Parents need to know that their children are home safely from school. If a child does not disarm the system within a scheduled time, Simon will call your telephone or pager to let you know.

Simple installation Because it's wireless, Simon installs in hours, not days—with no mess, no wires, no dust or imposition.

The features you are looking for

Programmable access codes Up to six individual codes – in 4, 5 or 6 digits – allow all family members to have their own access code.

24 hour backup battery Keeps the system up and running, protecting you in the event of longer power outages.

Optional home control Control lights, appliances and more by time schedule, keychain touchpad or sensor.

Emergency buttons Three programmable buttons let customers summon help quickly for different types of emergencies.

Arming level status LED All it takes is a quick glance and customers can confirm arming status.

Latchkey messages Get notified by phone or pager if a child has not arrived home by a scheduled time.

System control to carry with you

Simon offers pushbutton control you can carry on a keychain or keep bedside.

Remote telephone control

Monitor and control security from any touchtone phone.

The GE Simon security system monitors your home 24 hours a day, providing advance warning of any threat to your family's safety. When a sensor detects an emergency, the signal goes out immediately to the central monitoring station, which sends proper authorities rushing to the scene.

Protection 24 hours a day

Emergency detected

Monitoring station notified

Authorities respond

Put together your personal security system

Security for life

You'll never worry that your security system isn't right for you. Simon gives you the exact security you need today. And if requirements change in the future, it's easy and economical to modify your system.

Your family deserves the best protection you can give it. Simon is your best solution. You can tailor it to match your precise security and life safety needs. Then you can rest easy because Simon is watching over your home, family and possessions 24 hours a day.

Simon...Honored by Electronic House magazine as a 2002 Product of the Year for its contribution to the connected home industry.
